FINAL ACTION

1. Applicant's amendments and remarks filed 11/19/04 have been considered.

Applicant's amendments have overcome the previously stated prior art rejections, however the claims conflict with an issued patent, and therefore are rejected under the double patenting statutes, as detailed below.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 21, 37-42, 44-47 and 53-54 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1,3 and 5-8 of prior U.S. Patent No. 6838403. This is a double patenting rejection. The claims of the issued patent recite a laminate comprising a filled biodegradable film, i.e. wherein the one biodegradable film inherently constitutes 100% of the film thickness.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA

Art Unit: 1771

1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 22-26, 31, 35, 48-52 and 57-58 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3 and 5-8 of U.S. Patent No. 6838403. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limitations of the presently claimed invention would have been obvious to one of ordinary skill in the art. With respect to the types of nonwoven webs required by claims 22-26, all are well-known in the art as conventional nonwovens used in the art for the type of laminate that is claimed.

Claims 31, 35, 51, 52, 57 and 58 would have been obvious to one of ordinary skill in the art, even though the issued claims do not disclose specific intended uses. Firstly, the intended use does not provide patentable distinction when it does not change the structure of the laminate itself. Secondly, the specification of the issued patent clearly states the same intended uses. Therefore, applicant could have presented claims including intended uses in the issued application. Thirdly, breathable stretch-thinned biodegradable films are well-known for use in the claimed products.

Claims 48-49 would have been obvious because they are conventional ways of forming a breathable laminate from a filled film.

Regarding claim 50, it would have been obvious to determine the optimal number of layers in the patented invention.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
